

Custom Products

Specialized Customized Fabrication

Laser and water jet cutting are available.

Stainless Steel, Alloy 20, Hastelloy, Inconel Monel and other materials are available.

Quoting/Estimate Requirements

Please provide the following information when requesting a quote from your sales representative:

- Material type
- Material dimensions
- Special requests of finishing
- Mesh size, wire diameter and alloy
- Make and model of equipment used
- Manufacturing requirements

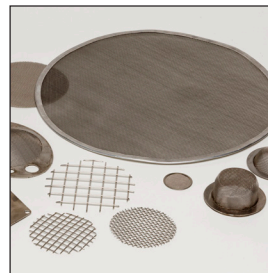

Filter Elements

Filters are designed to be cleaned and reused which helps to reduce waste, pollution and production costs. Material styles include wire mesh, pleated wire mesh, wedge wire, perforated and expanded metals.

Strainer Elements

Elements are fabricated to your exact specifications using a variety of styles including wire mesh, wedge wire, perforated and expanded metal.

Punch Parts

Custom cut, punched and stamped materials can be made to virtually any size; large or small with long or short runs

Contract Manufacturing

If you are looking for a manufacturing partner who can provide you with a turnkey solution we can help. We are a metal solutions company that is certified to ISO 9001 and AS9100 quality management systems. From your design to finished goods we are your answer to the challenge of building your product in house. Our access to raw materials and knowledge of best manufacturing practices allow us to provide you with a competitively priced product.

No minimum quantities required.
